Prepared by the World Analysis Branch, International Economics Division, Economic Research Service, U.S. Department of Agriculture. Principal coordinators were John C. Dunmore III, Thomas A. Warden, and Thomasine B. McCall. Mary L. Fant provided statistical support. Greg J. Acton provided word processing and table formatting support. Editorial support was provided by Linda L. Hatcher, Research Information Branch, Economics Management Staff. Data processing support was provided by Sharlan Lindow, William Meiller, Phil Rose, and David Hopkins, International Economic System Branch, Data Services Center, and Penni Korb, World Analysis Branch.

Farm Exports Down \$500 Million in 1983 (see p. 3). Total U.S. agricultural export values slipped during calendar year 1983 to \$36.1 billion from \$36.6 billion in 1982. Volume also declined. The reduction resulted from lower global import demand associated with economic recession and improved crops in many areas. Higher prices in late 1983 reflected shortfalls in U.S. corn and soybean crops. Soybeans and products remained the largest export category, followed by corn and wheat.

U.S. Agricultural Imports Up 8 Percent in 1983 (see p. 32). Values for farm product imports rebounded last year to \$16.6 billion from \$15.4 billion in 1982. A resurging U.S. economy and greater import demand boosted values for competitive agricultural items to \$11.1 billion from \$10 billion in 1982. Lower import prices for many products and depreciated foreign currencies (relative to the dollar) made imports more attractive to U.S. consumers. Growth in farm product imports last year included live animals, fruits and vegetables, wine, tobacco, and a wide range of specialty items.

Dollar Up Sharply in Last Quarter of 1983 (see p. 55). The U.S. dollar appreciated 4-6 percent relative to most European currencies during October-December 1983. For 1983, the dollar gained substantially against the German mark, the French franc, the British pound, the Swiss franc, and the Italian lira. High interest rates payable on dollar deposits and generally uncertain political and economic conditions are keeping the dollar strong.

U.S. Agricultural Exports to Sub-Saharan Africa To Increase in Fiscal Year 1984 (see p. 61). Although values for U.S. farm product exports to Africa dropped to \$820 million during fiscal year 1983, values for 1984 shipments are forecast at \$1.1 billion. A strong recovery is expected for grains, especially corn to drought-afflicted South Africa. Exports to Nigeria, the second largest market, are expected to increase somewhat but are not expected to return to their 1981 and 1982 levels.

Major International Markets for Agricultural Products (p. 66). The same agricultural importers, with the exception of China, a recent entrant, remained in the top 10 ranking through the last decade. The value of their imports amounted to \$145 billion, 58 percent of the world total. The U.S. market share of world agricultural imports averaged 16.2 percent in 1980-82.

U.S. Agricultural Exports Under Government-Financed Programs Up in Fiscal Year 1983 (see p. 69). Values for farm product exports under Public Law 480 and Agency for International Development programs totaled \$1.2 billion in fiscal year 1983, slightly above those for 1981/82. Long-term dollar credit sales rose 11 percent to \$789 million, while volume gained only 5 percent. Egypt took most of the Title I commodities. Donations under Title II increased slightly, with voluntary relief agencies accounting for over one-half of total shipments.

## Farm Exports Down \$500 Million in 1983

U.S. agricultural export values fell in calendar year 1983 to \$36.1 billion. Volume also fell 3 percent to 148 million tons. Over the past 2 years, worldwide import demand for and export supply of agricultural products, particularly U.S. products, have undergone substantial adjustments. High global producer prices encouraged greater production, which in turn, combined with a debilitating recession, lowered import demand. Since 1981, when U.S. export values peaked at \$43.3 billion, export quantity has fallen 9 percent, mainly reflecting adjustments by importers; prices have fallen about 8 percent, primarily reflecting adjustments by exporters.

The outlook for 1984 is dominated by improved economic growth conditions and short U.S. supplies of feed commodities, primarily corn and soybeans. Export prices may rise 10-15 percent, while quantity shipped may drop 4-6 percent.

Soybeans and products were the largest export earners in 1983, bringing in \$7.9 billion in revenue, about 3 percent less than in 1982. Corn moved ahead of wheat to second place with \$6.4 billion of exports compared with \$6.2 billion for wheat. Both corn and soybean exporters benefited from the year-end jump in prices to boost their revenue. Meanwhile, wheat prices remained steady throughout the year, near \$162 a ton.

Corn exports were down 1 million tons from the previous year, while barley exports were up 7 percent to over 1.5 million tons. A number of Mideast markets that had helped boost the barley export market in 1981 returned in 1983. East Asia (Japan, Korea, Taiwan, and China) and Mexico were the primary foreign markets for U.S. corn in 1983, with Western Europe and South Africa taking larger amounts late in the calendar year. Since 1980, when U.S. corn exports reached 63 million tons, exports have fallen below 50 million tons. This decline resulted mainly from reduced demand in Europe and the Soviet Union.

World soybean meal use fell moderately in 1983, unlike feed grain use which increased. However, nearly all of the increase in feed grain use was met by domestic supplies as global feed grain trade fell by 10 million tons, or 10 percent, during the year. Comparatively low prices for soybean meal and oil, vis-a-vis soybeans and corn, resulted in a greater demand for soybean products.

In the wheat export market, renewed Soviet buying along with expansion in the Indian, Brazilian, North African, and Iraqi markets kept wheat and flour exports from falling even further than the 3-percent drop recorded. Wheat production outside the United States has increased dramatically in the

past 3 to 4 years, putting pressure on most of the major exporters--the United States, Argentina, Canada, Australia, and the European Community (EC)--to extend not only lower prices but also liberal credit arrangements.

Rice exports fell 6 percent to 2.4 million tons in 1983. Thai rice shipments continue to erode the U.S. market share during a sluggish period in world rice trade.

Cotton exports were seasonally heavy in the last 4 months of 1983, reflecting firm demand and limited export supplies abroad. Exports for the year totaled 1.2 million tons valued at \$1.8 billion. (Steve Milmo, World Analysis Branch)

## U.S. Agricultural Imports Up 8 Percent in 1983

U.S. agricultural import values totaled \$16.6 billion in calendar year 1983, about 8 percent higher than those of 1982. Value gains in such major imports as cocoa products, sugar, cheese, fruits, vegetables, tobacco, rubber, bananas, live animals, cashew nuts, vegetable oils, wine, and malt beverages offset value declines in coffee and beef.

Noncompetitive import values of \$5.5 billion were 3 percent above year-earlier values. Values for coffee, which accounts for about one-half of all noncompetitive imports, totaled \$2.8 billion, or \$132 million lower than those of 1982. Brazil and Colombia provided 22 percent and 10 percent, respectively, of total coffee supplies, and Mexico, El Salvador, and Indonesia together shipped 23 percent.

Values for cocoa and products totaled \$841 million, 19 percent above those of the previous year. Quantity expanded by 22 percent to 447,000 tons, as importers and manufacturers replenished their depleted stocks. The Ivory Coast provided 25 percent of cocoa volume, followed mainly by Brazil, the Dominican Republic, and Ecuador. The New York cocoa bean futures price averaged 78 cents per pound in January 1983 but increased to \$1 in July and continued to \$1.12 in December 1983. With prospects of a potentially shorter world cocoa bean crop in 1984, cocoa prices will likely climb further.

The easing of the recession and renewed growth in the U.S. automobile industry expanded rubber import values to \$655 million, up 22 percent, while volume increased 7 percent, as prices rose. Apart from the increase in U.S. car sales, other factors in 1983 which caused rubber prices to rise were: (1) reduced output in West Africa, (2) expanded imports by China, and (3) increased stock holdings in the United States. Indonesia supplied about 54 percent of U.S. rubber import volume; Malaysia supplied most of the remainder.

Competitive agricultural import values totaled \$11.1 billion in 1983, 11 percent above 1982's total. Values for sugar imports increased 29 percent to over \$1 billion. Quantity rose 11 percent to 2.6 million tons. Principal sugar suppliers were the Dominican Republic, Brazil, the Philippines, Australia, and Argentina. Sugar import prices recovered in 1983 by averaging 15 percent above those in 1982, and totaled \$387 per ton. Wholesale prices in U.S. markets rose slightly from 18 cents per pound on January 15, 1982, to 22 cents on January 31, 1984. Wholesale sugar prices in calendar year 1984 are projected to increase 2-4 cents per pound above the 1983 annual average of 22 cents.

Values for meat and meat products, accounting for 18 percent of all competitive imports, remained at \$2 billion in calendar year 1983. Higher grain prices and poor pasture conditions forced farmers to sell a large number of fed and nonfed cattle, thus forcing prices down. Imports of fresh and frozen beef and veal, accounting for 57 percent of all meat imports, declined both in value and volume by 4 and 7 percent, respectively. Australia supplied over 50 percent of the U.S. beef and veal imports in 1983; New Zealand, the other major supplier, shipped another 29 percent. Larger U.S. domestic pork output in 1983 reduced imports 2 percent in value, mainly of fresh and frozen pork from Canada. Canned pork, chiefly from Western Europe, rose 30 percent in volume, mainly because of lower prices.

Most other competitive agricultural imports gained in value, including fruits, vegetables, dairy products, live animals, tobacco, wine, and malt beverages. The inflow of dairy products rose 3 percent in value to \$701 million. Most of the gain was in cheese, valued at \$383 million. New Zealand and Western Europe were the major suppliers.

Fruit and preparation imports rose 4 percent in value to \$1.0 billion. Imports of fresh grapes from Chile increased sharply from 1982 levels.

Vegetable import values expanded to more than \$1.2 billion following poor U.S. harvests. Canned mushrooms from Taiwan and China in calendar year 1983 exceeded the 1982 level. Imports of major fresh vegetables (tomatoes, cucumbers, squash, and eggplant) entering from Mexico were up sharply.

Swine entries from Canada rose 51 percent to 447,000 head due primarily to herd reduction and dollar exchange rates.

Reduced U.S. output of flue-cured tobacco in 1983 pushed imports of unmanufactured tobacco up 30 percent in volume to 239,000 tons, valued at \$743 million. Turkey, Brazil, South Korea, and Mexico were the principal suppliers.

Wine and malt beverage imports rose 9 percent in value and totaled \$1.4 billion in 1983. Italy, France, and West Germany were the chief suppliers of wines, with the Netherlands and West Germany providing beers.

The value of imported vegetable oils grew 20 percent in 1983 to \$475 million. The gain resulted mainly from increases in the volume of coconut oil, which accounted for 54 percent of all vegetable oil imported into the United States. Palm oil imports rose 32 percent in volume as prices declined 5 percent. Reduced U.S. output of soybeans and peanuts and higher domestic oil prices probably will result in larger palm oil imports in 1984. The Philippines supplied the bulk of the coconut oil, while Malaysia provided 88 percent of the palm oil. (Charles E. Goode, World Analysis Branch)

## Dollar Up Sharply in Last Quarter of 1983

Even the most bullish of dollar speculators scarcely anticipated the strength of the appreciation of U.S. currency in the last 2 months of 1983. Only the Japanese yen and Canadian dollar managed to weather the dollar's 6-percent rise against the German mark, 5-percent rise against the Dutch guilder, and 4-percent rise against the British pound. For 1983 as a whole, the U.S. dollar gained 15 percent on the mark, 24 percent on the French franc, 11 percent on the pound, and 10 percent on the Swiss franc. In addition, the dollar remains at near-record levels relative to the French franc, Italian lira, and British pound.

### Interest Rates Lead Dollar Surge

In 1983, the dominant factor affecting the dollar's appreciation was the high interest rates payable on dollar deposits overseas. When combined with low current and anticipated inflation, the real return on dollar holdings remains the highest for any major currency. Relatively high rates of return make any currency more desirable to hold, particularly for speculative purposes.

Factors thought by currency traders to affect interest rates also tended to fuel the view that U.S. currency would remain attractive. First, Federal Reserve policy has been restrictive for much of the year, leading to somewhat constrained credit availability. Second, the borrowing requirements of the Treasury have also put pressure on supplies of loanable funds. Last, the rapid pace of recovery adds to desires to borrow to finance expansion and inventory buildup. All in all, participants in currency markets believe that interest rates in the United States will continue to attract purchasers in 1984.

### Dollar a "Haven" Currency for Wary Investors

General world uncertainty, as a result of both conflict (Middle East) and elections (Great Britain, West Germany, and Japan), has reinforced the rush of individuals and institutions into stable stores of value. With inflation in the West, primarily the United States, in abeyance, gold has lost some of its luster. Instead, persons rally to acquire currency, which is more generally acceptable, is easily transferable, and earns interest. The U.S. dollar is by far the most desirable for each of those three reasons.

Major European currencies still seem very weak relative to the dollar. Sluggish economic growth and low interest rates have caused investors to turn to the United States, Japan, and Canada as sources of opportunity. Until turnarounds are clearly evident, most especially in West Germany, expectations are that the dollar is unlikely to depreciate noticeably in the near quarter. (David Stallings, World Analysis Branch)

## U.S. Agricultural Exports to Sub-Saharan Africa To Increase in Fiscal Year 1984

Values for U.S. agricultural exports to Sub-Saharan Africa declined 22 percent in fiscal year 1983 to just under \$820 million. This decline resulted from a strong dollar, along with high U.S. prices, competition from other suppliers, foreign exchange constraints, and lower export earnings by Nigeria, the United States' major market in the region. Values for shipments to Nigeria fell 38 percent, and export values to South Africa, the region's second largest market, dropped slightly to \$130 million.

Some recovery of U.S. agricultural exports to the region is expected in fiscal year 1984, led by increases in grains and oilseeds. Exports of grains and preparations will be up about 40 percent, and oilseed and product exports should be up 10 percent from those of fiscal year 1983. Values for U.S. agricultural exports to Sub-Saharan Africa for fiscal year 1984 are estimated at \$1.1 billion, some 30 percent above 1983's level and about the same as those of fiscal year 1982. The highest level of U.S. agricultural exports to the region was the \$1.3 billion reached in fiscal year 1981. Values for exports to Nigeria in fiscal year 1984 are projected at \$366 million, up about 11 percent from fiscal year 1983. Exports to drought-afflicted South Africa could reach \$334 million, nearly double the previous peak of \$175 million in fiscal year 1981.

### Grains Dominate Exports

U.S. exports of grains and preparations will account for some 80 percent of the total value of agricultural exports to Sub-Saharan Africa in fiscal year 1984. Despite the large increase projected, total 1984 grain sales will probably not reach the record levels of 1981. However, the anticipated record value and volume of feed grains will quadruple those of last year. This large increase will be due primarily to the record corn exports projected to South Africa, currently estimated at 1.3 million tons and valued at \$195 million. Nigeria will likely be a large U.S. export market in 1984 since Nigeria's domestic supplies are tight and its poultry industry is short on feed. The volume and value of wheat products will be up by 9 and 2 percent, respectively, and will account for about 42 percent of the value of U.S. grain shipments. The volume of rice will be about the same as that of last year, but the value is expected to be up 12 percent. Rice should account for 27 percent of the value of total U.S. grain shipments.

### Exports to Southern Africa at Record Levels

U.S. agricultural exports to the Southern African region are expected to reach record levels because of the severe drought of early 1983 in South Africa, Zimbabwe, Mozambique, Botswana, Lesotho, Swaziland, and Zambia. Corn production in South Africa in 1983 at 3.9 million tons was down about 53

percent from 1980; in Zimbabwe and Mozambique, grain output was down about 40-50 percent. Commercial corn imports by South Africa from the United States are projected at 1.3 million tons. Grain import requirements for the entire Southern African region have been estimated at about 4.2 million tons, but actual imports will be less due to limited commercial import capacity. Food aid needs in Southern Africa exceed 900,000 tons.

Besides the record corn shipments to South Africa, values for rice exports to that country could increase to \$55 million after last year's dip. But price competition could hurt U.S. sales. With South African oilseed production down sharply in 1983, imports of oilseeds and products will increase again, but supplier competition could prevent U.S. sales from reaching the projected \$40 million.

Values for exports to Lesotho are also expected to reach a record \$10 million, exceeding the previous high in fiscal year 1980 by 35 percent. Public Law (P.L.) 480 shipments will play a large role. A Title II agreement for 10,000 tons of U.S. wheat was recently signed. Also a large Title II Catholic Relief Service program has been authorized. This program includes bulgur, wheat flour, vegetable oil, and nonfat dry milk.

Exports to Zambia are expected to be relatively high in value at about \$15 million and will consist mainly of wheat, vegetable oil, and rice. Exports to Zimbabwe may reach \$10 million, three times the previous high in 1980, and will include mainly wheat and vegetable oils. Export values to Mozambique are also estimated at about \$10 million, well below the record of about \$16 million during fiscal year 1979. Rice, corn, and wheat will account for nearly all of fiscal year 1984 shipments.

The bulk of U.S. exports to Mozambique, Zambia, and Zimbabwe is concessional. All three countries had significant P.L. 480 Title II programs in fiscal year 1983 to assist with urgent food needs that developed as a result of drought. In addition, Zambia has a Title I program worth \$7 million. Aid in fiscal year 1984 is expected to continue at levels similar to those of the previous year. Food shortages will continue into at least the next harvest beginning in mid-1984. Some commercial exports of wheat to Zambia and Zimbabwe are also expected.

U.S. Farm Product  
Sales to Eastern  
Africa Up Slightly

U.S. farm product sales to Sudan are expected to increase 3 percent to about \$90 million in fiscal year 1984, as a result of both price and volume increases of inedible tallow and dry milk sales. The expansion in grain sales in fiscal year 1983 will be sustained in 1984. About 350,000 tons of wheat and 70,000 tons of flour valued at \$75 million are likely to be exported. About 75 percent of the wheat and flour will be sold through P.L. 480 Title I and the Commodity Import Program.

U.S. farm product sales to Ethiopia are likely to total \$8.4 million in fiscal year 1984, up nearly 85 percent, with expanded shipments of soy grits, vegetable oil, and dry milk under the P.L. 480 Title II program. These shipments are provided as emergency relief for drought victims. Sales to Somalia should expand over 15 percent to nearly \$30 million due to price and quantity increases in soybean oil and dry milk. Exports of soybean oil are expected to reach 13,000 tons valued at \$9.6 million. About 60 percent of the soybean oil will be sold under P.L. 480 Title I.

Values for exports to Kenya should be up about 15 percent to around \$27 million but will remain below the record \$35.2 million of fiscal year 1980 when Kenya's corn harvest was very low. P.L. 480 wheat and rice are again expected to account for over 50 percent of total sales, with nonfat dry milk and vegetable oil also important. Tanzania's agricultural imports dropped sharply in fiscal year 1983 as its foreign exchange reserves continued to decline. Also, its food production improved in 1982. A P.L. 480 rice shipment in 1984 could account for nearly one-half of U.S. sales which are estimated at \$12 million.

U.S. Exports to  
Nigeria Will Not  
Reach 1981 Record

Values for U.S. agricultural exports to Nigeria are projected to increase 11 percent to \$366 million in fiscal year 1984. Nigeria will not be the \$500-million market that it was during fiscal years 1981 and 1982 because sharply lower Nigerian oil exports dropped export earnings from \$26 billion in 1980 to an estimated \$13 billion in 1983. Because of this decline, Nigeria imposed import restrictions which affected U.S. agricultural exports to that country, particularly of corn and rice. Nigerian imports of U.S. rice declined from 389,000 tons in fiscal year 1982 to 167,000 tons in fiscal year 1983 because Thai rice was priced nearly \$200 per ton lower. Any recovery in rice shipments will depend on favorable credit terms from the United States and perhaps more competitive prices. Values for wheat shipments are projected to rise about \$10 million with small increases in both quantity and price. Higher prices for tallow, rice, and corn will account for the remainder of the increase. Sales of U.S. corn should pick up in fiscal year 1984 as Nigerian trade restrictions are eased. Corn stocks from the record 1982 harvest are now depleted.

Sales to other West African countries depend largely on P.L. 480 financing. Rice shipments to Liberia are expected to continue in fiscal year 1984 at a relatively high level. Sales to Guinea are estimated at 17,000 tons and those to Sierra Leone about 9,000 tons. Because of food shortages, Ghana will receive additional food aid. Zaire is a fairly large market dominated by wheat exports which account for 85 percent of the \$30-million U.S. export forecast. Just under half of these wheat sales will be financed by P.L. 480 Title I. (Margaret Missiaen, Michael E. Kurtzig, Peter Riley, and Larry Witucki, Africa and Middle East Branch)

## Major International Markets for Agricultural Products

Although their rankings changed slightly, the top 10 importers of agricultural products, with the exception of China, a recent entrant, remained the same from 1970 through the 3-year period 1980-82 average. These 10 importers were as follows: West Germany, the USSR, the United States, Japan, the United Kingdom, France, Italy, the Netherlands, Belgium-Luxembourg, and China. Together, the values of these countries' imports amounted to \$145 billion, 58 percent of the world total.

### Changing Markets: Growth and Decline

The major growth markets have been in the less-developed countries (LDC's), primarily in the Middle East. Saudi Arabia, ranking number 38 in 1970, ranked number 11 in 1980-82 with a 1.9-percent share of world exports. In 1980-82, Egypt's imports were valued at \$3 billion, moving it from its 1970 ranking of number 42 to number 16. Iraq, with imports valued at \$1.9 billion, moved from number 61 in 1970 to number 30. Markets outside the Middle East grew as well. For example, Mexico ranked number 44 in 1976 but moved up to number 19 in 1980-82, with imports valued at \$2.8 billion. Nigeria improved its 1970 ranking of number 57 to number 23 in 1980-82, with imports valued at \$2.3 billion.

Values of imports fell primarily in the centrally planned and Western European countries. Czechoslovakia, number 15 in 1970, declined to 29 in 1980-82. East Germany moved from 12 to 24 in 1970 and 1980-82, respectively. Sweden had been ranked number 16 in 1970 but declined to number 27 in 1980-82.

### U.S. Market Share

In 1980-82, the U.S. market share of world imports (\$247 billion) was 16.3 percent. The United States had the greatest share, almost 22 percent at \$89 billion, in the EC market. In single countries, the United States had the greatest market share in various LDC's. These markets included Mexico, 73 percent; South Korea, 51 percent; Taiwan, 45 percent; and Venezuela, 41 percent. Together, these countries imported a total of \$11 billion. The United States also had a large market share in a few developed countries as well. These countries included Canada, 41 percent; Japan, 35 percent; and Spain, 32 percent. In the centrally planned countries, the United States had the largest share, \$5.3 billion or about 38 percent, of China's market.

The majority of the growth in U.S. market shares was in the centrally planned countries. The U.S. share in Poland's market grew from less than 9 percent in 1970 to 16 percent in 1980-82; in Romania, from 13 percent to 25 percent; and in China, from 15.5 percent to nearly 36 percent. The U.S. share of USSR's imports grew from less than 1 percent to nearly 8 percent.

The U.S. market share also declined in countries in various regions of the world. In Iran, a country that increased its imports, the U.S. share fell from 21 percent in 1970 to less than 4 percent in 1980-82. Libya is another example of a country with increasing imports in which the U.S. share declined, from 5 percent to less than 1 percent. In Denmark, a country that has maintained a stable ranking, the U.S. share fell from 23 percent to 7 percent. (Stacey Levitt, World Analysis Branch, and Arthur B. Mackie, Office of the Director)

Table 20--Major markets for agricultural products, average 1980-82

| Country and rank     | Agricultural imports from: |               | Country ranked by importance |      | Share of country imports |               | U.S. share in major markets |      |

## U.S. Agricultural Exports Under Government-Financed Programs Up in Fiscal Year 1983

Agricultural export values under U.S. Government-financed programs totaled \$1.2 billion in fiscal year 1983 compared with \$1.1 billion in 1982, mainly due to rises in Title I sales and Agency for International Development (AID) disbursements. In fiscal year 1983, government programs accounted for 4 percent of all U.S. agricultural shipments. Principal recipients for food aid in 1983 were Egypt, Bangladesh, Sudan, India, Pakistan, El Salvador, Peru, and Indonesia. Major commodities under Government-financed programs for the year were wheat, 40 percent of total value shipped, and rice, soybean oil, and wheat flour, each 12 percent.

Title II donations of \$291 million rose 2 percent in fiscal year 1983. Over half of the Title II donations were shipped by voluntary relief agencies. The World Food Program shipped 32 percent of the donations; 16 percent were government-to-government shipments. India received 28 percent of Title II donations. Major commodities included wheat, soybean oil, bulgur wheat, blended foods, and wheat flour.

Exports of \$789 million under Title I long-term dollar credit sales were 11 percent higher in value and 5 percent higher in volume for fiscal year 1983 compared with those of 1982. Eleven commodities were shipped under Title I; wheat, rice, wheat flour, soybean oil, and corn accounted for 97 percent of these shipments. Values for rice, wheat, and wheat flour dropped, and volume for rice, corn, and soybean oil rose. Egypt received the highest percentage (31 percent) of the total value of Title I long-term dollar credit sales.

AID disbursements increased in 1983 to a total of \$130 million. Egypt received \$94 million of those transactions, with corn being the largest commodity in value and volume. (Fanny Lockley, World Analysis Branch)

CONTINUED

*More aggressive U.S. marketing and a re-direction of trade programs already in place would help to close the gap with the European Community in the world market for high-value agricultural products (HVP's).*

*The potential payoff in closing that gap is impressive: If by 1990 the U.S. expanded its HVP exports by half again as much as the present level, it would gain an additional \$50 billion in GNP and an additional 1 million U.S. jobs.*

*The U.S. share of world trade in HVP's, chiefly processed and semiprocessed food products, stagnated at about 10 percent from 1970-80, while the EC share, with its exports growing by 20 percent per year in that decade, stood at five times the U.S. level.*

*For more information on the growing market in HVP exports and the not always friendly U.S.-EC competition, be sure to get "High-Value Agricultural Exports: U.S. Opportunities in the 1980's." See box for ordering information.*

#### HOW TO ORDER

For your copy of "High-Value Agricultural Exports: U.S. Opportunities in the 1980's" (GPO no. 001-000-04371-4), send \$4.50 in check or money order to Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. Make check or money order payable to Superintendent of Documents. Be sure to include the GPO number in your order. For faster service, call GPO's order desk at (202) 783-3238 and charge your purchase to your VISA, MasterCard, or GPO deposit account. Foreign addresses, add additional 25 percent.

## To Market, to Market...

Keep a step ahead of your competitors by getting the best government forecasts around on commodity-specific export potential through 1990 for selected countries in Africa, Asia, Latin America, and the Mideast.

Each issue of **Export Market Profiles**—a new series by USDA's Economic Research Service and Foreign Agricultural Service—will highlight the production potential of one country's agricultural sector, major trade policies, and export potential for U.S. commodities.

Titles off press thus far in the series include: **TAIWAN:** An Export Market Profile, 96 pp., \$4.50, GPO no. 001-000-04345-5. **DOMINICAN REPUBLIC:** An Export Market Profile, 36 pp., \$3.50, GPO no. 001-000-04364-1.

To order, write to Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. Make check or money order payable to Superintendent of Documents. Be sure to include the report's GPO number in your order. For faster service, call GPO's order desk at (202) 783-3238 and charge your purchase to your VISA, MasterCard, or GPO deposit account. Foreign addresses, add additional 25 percent.

As future titles become available, they will be advertised in **ERS Abstracts**, a free newsletter published 4-5 times per year. To subscribe, write to ERS Abstracts—EMP, EMS-INF, Room 4309-S, U.S. Department of Agriculture, Washington, D.C. 20250. Or call Tom McDonald on (202) 447-7305.
